ClinAudits Attains Women-Owned Business Enterprise Certification

ClinAudits, LLC, a business providing compliance auditing and consulting services, has been granted National Women's Business Enterprise Certification by the Women's Business Enterprise National Council (WBENC).

WBENC's national standard of certification involves a detailed examination of business processes and a site inspection. This certification confirms that the ClinAudits is at least 51% owned, operated, and controlled by a woman or women.

This certification permits companies and government agencies committed to furthering diversity programs to identify qualified businesses. WBENC is the nation's largest third party certifier of businesses owned and operated by women in the United States. WBENC is a resource for the more than 700 US companies and government agencies that rely on WBENC's certification as an integral part of their diversity programs.

"ClinAudits is proud and pleased to have attained this certification and distinction," stated Cheri A. Wilczek, President and Founder of ClinAudits. "We plan to continue providing our clients with high quality, customer-centric compliance services."

About ClinAudits

ClinAudits is an independent, 3rd party provider of quality assurance and regulatory compliance auditing and regulatory consulting services to the pharmaceutical, biotechnology, medical device and biologicals industries. While specializing in Good Clinical Practice (GCP) audits of clinical research trials, ClinAudits' services extend to Phase I-IV clinical studies of pharmaceuticals, as well as serving the needs of clients developing medical devices, biotechnology, biologicals, gene therapy agents and Rx to OTC drugs. ClinAudits serves its client's needs for compliance with GCP, GMP, and GLP.

Since 1994, ClinAudits has delivered these services both domestically and internationally including locations in the North America, South America, Europe, Asia (India, Russia, China, Taiwan), South Africa and Australia/New Zealand. ClinAudits has a team of regionally-based auditors, located in the U.S., Canada, and Europe with extensive experience in clinical research and drug development. This experience encompasses a broad range of disciplines including, but not limited to: Oncology, Infectious Diseases, Respiratory Diseases, Central Nervous System (CNS), and Dermatology.
